

# Govind Jindal

B.E. CSE (AI & ML) · Chitkara University · Batch of 2029

+91-8168717582 | govindjindal7808@gmail.com | LinkedIn | GitHub | Hisar, Haryana

## EDUCATION

Chitkara University — B.E. Computer Science Engineering (AI & ML Specialisation) Aug 2025 – May 2029

CGPA: 10.0 / 10.0 (Semester 1) | Coursework: Frontend (HTML, CSS, Javascript), Python, C, Digital Electronics, Intro to AI and its Fundamentals, Discrete

## PROJECTS

ASHA-VANI — Offline AI Health Copilot for Rural India Eclipse 6.0, Thapar University

Python Qwen2.5-3B Oumi Fine-Tuning FastAPI React Edge Deployment

Fine-tuned a **3B-parameter Small Language Model** (Qwen2.5) via the Oumi framework for Hinglish medical triage, enabling ASHA workers to receive expert-level AI guidance with **100% offline operation** — no internet required.  
It gets instantly activated by the wake word "ASHA".  
Engineered FastAPI voice pipeline + React frontend achieving **<500ms end-to-end latency** on edge devices, delivering real-time life-saving triage support to India's most remote rural communities.

BODHI — AI-Powered Fintech & Investment Platform FINVASIA Hackathon, Chitkara University

React Native TypeScript FastAPI AWS Gemini 1.5 Flash Sarvam AI Razorpay

Built a full-stack fintech app featuring group expense tracking, micro-investment clubs with **democratic trade voting**, and a proactive **Gemini 1.5 Flash** AI financial assistant running in the background.  
Engineered a polished UI/UX with a modernized navigation flow, replacing standard assets with a professional, minimalist design.  
Integrated Sarvam AI for multilingual support and Razorpay for live trade execution; deployed on **AWS** serving real-time market simulation and portfolio management.

Sign Setu — Indian Sign Language Accessibility Platform Hack Helix, Thapar University

Next.js 15 React 19 Django spaCy NLTK AssemblyAI Three.js Tailwind CSS 4

Developed a multi-modal ISL (Indian Sign Language) conversion platform processing **text, audio, and video** into ISL gloss notation, bridging the communication gap for India's deaf/hard-of-hearing community.  
Leveraged spaCy + NLTK for NLP pre-processing and AssemblyAI + OpenRouter LLM pipeline; integrated Google Translate to support regional Indian languages.

Logic Flow — Virtual Digital Electronics & Architecture Lab Frontend Project, Chitkara University

HTML CSS JavaScript

Built a fully browser-based simulator for Digital Electronics & Computer Architecture, providing university-level virtual lab access to students without physical equipment — **can be adopted at Chitkara University**.

## TECHNICAL SKILLS

**Languages** Python, JavaScript, TypeScript, C, HTML, CSS  
**AI / ML** NumPy, Pandas, Matplotlib, LLM Fine-Tuning (Oumi), Prompt Engineering, RAG  
**Frameworks** React, React Native, FastAPI, Node.js, Vite, Three.js, Framer Motion  
**Cloud & DB** AWS, Vercel, Render, PostgreSQL, Git & GitHub  
**Design Tools** Figma, Blender, Canva, Android Studio, Xcode

## ACHIEVEMENTS

**Hackathons** (7 competitions — Thapar, NIT Hamirpur, Chitkara, & International)  
**Eclipse 6.0** — Thapar University ASHA-VANI (offline AI health copilot), Aegis  
**Hack Helix** — Thapar University Sign Setu (ISL communication bridge)  
**FINVASIA** — Chitkara University BODHI (AI fintech & investment platform)  
**Hack Secure** — NIT Hamirpur Liquid Defence  
**SIH Internal** — Chitkara Ayursutra  
**Sustainability** — Canadian Uni. Dubai Fractal Fire Mamba

## Certifications

**Microsoft** Azure Fundamentals (AZ-900), Azure AI Fundamentals (AI-900)  
**Oracle** Cloud Infrastructure AI Foundations  
**DeepLearning.AI** AI and Disaster Management  
**Cisco** Apply AI: Analyze Customer Reviews; Introduction to Modern AI  
**BID (x5)** Natural Disaster Risk, Qualitative & Quantitative Analysis, Climate Change Risk Assessment
